Disclaimer

Off road activities can be hazardous and could lead to injury, dismemberment, paralysis and death. No warranty of representation is made as to the products ability to protect the user from any injury or death. The user assumes that risk. The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

Tools Required

3/16" Allen
Wrench

Step 1: Locate all the pieces (2 mirrors & 2 Clamps) make sure everything is accounted for and undamaged.

Step 2: Remove the 2 Allen head bolts from each clamp. Locate the half clamp that contains the drilled mirror indicator holes. (Reference Figure 1)

Dragonfire Racing

Step 3: Place the drilled side of the clamp up to the desired location on the roll cage. It is best to have the driver of the car in the seat and have a helper for this step. While holding the half clamp flush on the cage, place Mirror on the clamp ensuring that both pins on the mirror have set down into the indicator holes on the clamp. Once the ideal setting has been reached hold the two pieces together and remove from cage.
(Reference Figure 2)

Step 4: Continue holding the two pieces and install supplied Allen head bolt to secure the two pieces. Repeat steps 2 & 3 for the other side of UTV.
(Reference Figure 3)

Step 5: Loosely install the mirrors onto the cage using 3/16" Allen wrench. Snug cage clamp down evenly and be sure to check position frequently. Once desired location has been reached hand tighten the cage clamps until both mirrors are snug.
(Reference Figure 4)

Note: *Clamp may scratch cage when installed*

Step 6: Check that both mirrors are installed properly and check that both mirrors are in the correct position from the drivers seat before use.

Pro Tip

***Be sure to check that all hardware is secured frequently: re-tighten as needed.**

***Never rotate mirror when indication pins are engaged, may result in severe damage to mirror.**
