### Disclaimer

Off road activities can be hazardous and could lead to injury, dismemberment, paralysis and death. No warranty of representation is made as to the products ability to protect the user from any injury or death. The user assumes that risk. The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

Step 1: Place vehicle on flat level surface. Place gear shifter in park and remove key.

Step 2: Remove 2 factory T27 screws from lower front clip (See Figure 1)

Dragonfire Racing

Step 3: Use 5/16" Drill Bit and Drill to enlarge both factory lower mounting points (See Figure 2)

Step 4: Place bumper onto front of car by aligning two lower studs with the now enlarged holes at the bottom of front clip. Install supplied hardware in two upper mounts on bumper. (See Figure 3)

Step 5: Using supplied nuts and washers secure the two lower mounting points from backside of front clip. (See Figure 4)

Step 6: Once bumper has been fully installed you may insert your bumper end caps by pressing into place. (See Figure 5)

- **For further assistance please contact your authorized DragonFire Dealer**
- **Frequently check hardware to ensure it is securely fastened.**
