DragonFire RZR Switch Pod

RZR, RZR S, RZR 4, RZR XP, RZR 570 (2008-2012)

Congratulations on your purchase of the DragonFire Switch Pod. This kit is specifically designed to give you a clean and useful place to put switches for all of your utilities and accessories. Looks good, works great, and it all comes in one box. Please carefully read these instructions before installing switch pod. If there is any sign of damaged or missing parts contact your authorized dealer prior to install.

Tools Required

5/32 Allen Wrench

7/16 Open Ended
Wrench

Brad Puller or Flat Head
Screw Driver

Dragonfire Racing

Step 1: Remove kit from packaging and ensure that all parts and hardware are present and accounted for. If there is any sign of missing or damaged parts, contact your authorized dealer prior to install.

Step 2: Locate and remove two factory plastic rivets using brad puller or flat head screw driver. (Plastic pins will be re-used) (Seen in Figure 1)

Figure 1

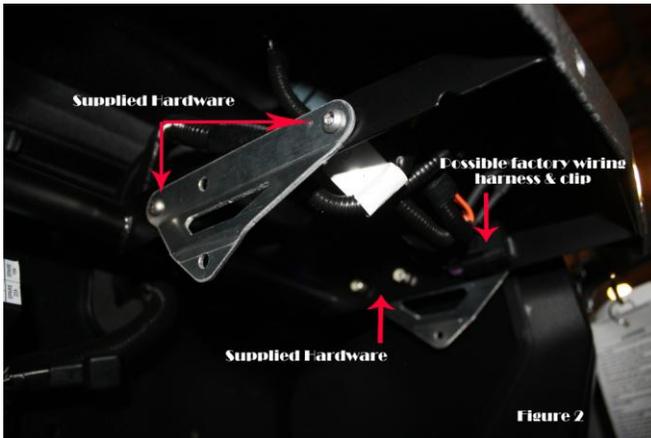

Figure 2

Step 3: Locate factory dash support bracket. Install two supplied pod hangers using supplied Allen head screws and nuts. Ensure that the bends in the hangers are facing away from each other. In some cases stock wiring harness will be installed, simply remove clip and harness from dash support bracket and re-install in open hole located on pod hanger bracket. (Seen in Figure 2)

Step 4: Locate switch pod housing. Install switch bezel through front and secure from the backside with bezel retaining plate. (Pro Tip: this is a good time to decide what switches will be used as well as get wiring done. Space will be limited once pod is installed) (Seen in Figure 3)

Figure 3

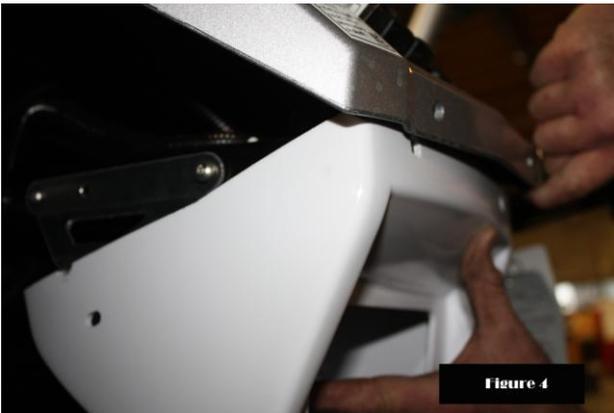

Figure 4

Step 5: Place pod under dash. Ensure that pod lays over both hanging brackets and under dash plastic. (Seen in Figure 4)

Step 6: Secure pod with the two supplied plastic push pins. (Seen in Figure 5)

Step 7: Secure sides of Pod with stock plastic pins that were removed in (Step 2)

(Seen in Figure 6)
